EDUCATION

Bachelor of Applied Science in Computer Science

University College Leuven - Limburg

2023 – 2026 | Leuven, Belgium

WORK EXPERIENCE

Software Developer (Part-time), Novable

05/2026 – Present

- Owned and delivered **production-ready** features across customer-facing and internal applications, contributing to frontend and backend development while improving complex product workflows and user experience.
- Collaborated closely with the CTO on product development, technical decisions, and analytics integration, shipping iterative improvements in a fast-paced **B2B SaaS** environment.
- **Stack:** React, Next.js, TypeScript, Ant Design, Redux, Mixpanel, Python, Django

Frontend Developer Intern, Novable

09/2025 – 04/2026

- Redesigned core platform views and shipped frontend features used by real clients in production, improving information hierarchy and workflow efficiency
- Grew from debugging and refactoring into owning larger features — participating in design feedback loops, brainstorming sessions, and iterative product decisions
- **Stack:** React, Next.js, TypeScript, Ant Design, Redux, Mixpanel, Python, Django

PROJECTS

Unsent Stories, UCLL #MovingMinds

05/2026 – 06/2026

- Served as QA & Testing lead on a 5-person team building a web platform that simulates live theatrical chat performances, revealing pre-authored conversations in real time to audience viewers.
- Designed and executed end-to-end test plans using Playwright, covering the theatre playback engine, admin scenario management, and user authentication flows; the platform is currently in active use by the client.
- **Stack:** Next.js, TypeScript, Tailwind CSS, ASP.NET Core 9, MongoDB, Playwright

Artfolio, Cloud-Native Art Marketplace, UCLL

03/2026 – 05/2026

- Built and deployed a full-stack art marketplace on Azure, backed by serverless Azure Functions and Cosmos DB — supporting artwork listings, exhibitions, social interaction, and cart/checkout.
- Set up end-to-end CI/CD with GitHub Actions for containerised frontend/backend deployments; implemented JWT auth with role-based flows and function-layer token validation for serverless compatibility.
- **Stack:** Next.js, TypeScript, Java, Azure Functions, Azure Web App, Azure Cosmos DB, Docker

Distributed Social Network Platform, UCLL

12/2025

- Designed and implemented a distributed social platform using a microservices architecture, separating core domains (users, posts, feeds, notifications) to ensure scalability and service isolation.
- Implemented an end-to-end post creation flow combining synchronous validation and transactional persistence with asynchronous event-driven processing, supported by comprehensive unit, integration, and contract testing.
- **Stack:** Java, RabbitMQ, PostgreSQL, Spring Cloud Gateway, Docker, OpenAPI, Testcontainers

Vinylify, Full-Stack Music Collection Platform, UCLL

05/2025

- Built backend APIs with Node.js/Express & PostgreSQL/Prisma to process RFID scans in real time, detecting duplicates and updating collections instantly.
- Collaborated in a Scrum team of 7, integrating secure authentication with NextAuth.js & JWT, and developing a Next.js frontend enabling live scanning demos, instant recognition, and chatbot interaction.
- **Stack:** Node.js, Next.js, PostgreSQL, Prisma, TypeScript, Cypress

PARTICIPATION

"Talent Portal" Hackathon, EUDRES - European University Alliance

02/2024 | Leuven, Belgium

Practiced rapid prototyping, Agile collaboration, and pitching by delivering a working MVP in **36 hours** and presenting the solution to an international jury.

TECHSTACK & SKILLS

Frontend

TypeScript, JavaScript, React, Next.js, Tailwind CSS, Ant Design, Redux

Backend & Databases

Java (Spring Boot, Spring Security), Node.js, Express.js, Python, RESTful APIs, PostgreSQL, Cosmos DB, Prisma ORM

Cloud & Toolings

Azure (Functions, Web App, Cosmos DB), AWS, Docker, GitHub Actions, CI/CD, Cypress, Jest, Git, Agile/Scrum

CERTIFICATES

AWS Cloud Practitioner (CLF-C02): DataCamp (12/2025)

LANGUAGES

English — Fluent | Vietnamese — Native
